

Multimedia Production Platform: a new category of A3 color devices:

Multimedia

When it comes to variety, size and thickness of media, the C941dn greatly extends the OKI heritage of media support. It easily handles 360 gsm extra-thick card stock, 14 mil polyester, magnetic media... in sizes ranging from 3" x 5" index cards to 13" x 52" banners.

Production:

The C941dn has affordable digital short-run capabilities—with the added flexibility of being able to apply white or clear toner. Produce striking comps, one-offs and reprints at up to 50 ppm, utilizing white text and graphics on dark media, or by applying spot gloss selectively, with eye-catching results.

Platform:

This is not an office copier. The C941dn has a printer-based engine with a new design, driven by an aggressive effort to create a rugged and affordable device. It features short-run capacities, short-run speed, and delivers stunning output across the widest range of media. And by adding the optional EFI® Fiery® XF Server for enhanced color management and simplified workflows, the C941dn is a formidable, professional device.

Introducing the C900 Series

C941dn

With extraordinary results that transcend expectations, this one-of-a-kind device delivers in so many ways. The revolutionary **new C941dn LED digital color printer** features a five station toner configuration with cyan, magenta, yellow and black, plus white or clear in the fifth position; this provides an expansive new world of printing capabilities and revenue-generating opportunities. In fact, the C941dn from OKI is the first LED printer in its class to offer white or clear spot color printing and other productivity-enhancing capabilities, and is available with an EFI Fiery XF server.

Graphic design/On-demand printing

- First 5-station LED/Laser printer: supports White and Clear spot color
- PANTONE® Certified
- True 1200 x 1200 dpi resolution
- Up to 50ppm in Color and Mono¹
- Optional Fiery® XF RIP server

Cost containment/Efficiency

- Lowest total cost of ownership (TCO) in its class
- Highest capacity consumables in its class (up to 38,000 pages²)
- Holds up to 2,950 sheets with options

¹ Published performance results based on laboratory testing of simplex sheets. Individual results may vary.

² Based on ISO 19798.

The C931dn and C911dn

C931dn digital color printer supports an optional EFI Fiery XF server. Designed for large workgroups and office use, the C931dn offers full color, high resolution printing capabilities, and handles a wide range of media for maximum output flexibility at a low total cost of ownership (TCO). In fact, the TCO for the C931dn is 25 percent lower versus comparable models from competing manufacturers¹.

The C911dn offers improved speed, print quality and performance over its predecessor. As with all C900 Series models, the C911dn features a more robust chassis, improved user interface featuring a high resolution color LCD display, and higher capacity toners for a low cost per page.

Highlights for both models include:

- Up to 50 ppm (letter size)
- Supports media sizes from 3 x 5 inch index cards, Tabloid extra and 12.9" x 52" banner paper
- Supports up to 360 gsm media
- Paper handling expandability, and much more...
